DETAILED ACTION

Claims 1-5 and 14-18 are acknowledged as canceled, and new Claims 24-35 are entered and are pending in this application and were examined on their merits.

New Rejections necessitated by Applicant's amendment

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 24-35 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 24 and 29 are drawn to a method for identifying a candidate therapeutic for fat reduction and a candidate therapeutic for treating non-insulin dependent diabetes dependent mellitus (NIDDM) respectively. Each of the two claims contains a single method step, that of determining whether a test molecule that interacts *in vitro* with (i) a nucleic acid having a nucleotide sequence of SEQ ID NO: 1 or

(ii) a protein having an amino acid sequence of SEQ ID NO: 2 either; (Claim 24) reduces fat deposition or (Claim 29) modulates a NIDDM symptom.

The step of determination is deemed by the Examiner to constitute a purely mental step, for example Webster's dictionary defines determine as, "to settle or decide by choice of alternatives or possibilities". Therefore, neither claim contains positive assay steps, for example, contacting a test molecule with a nucleic acid having a nucleotide sequence of SEQ ID NO: 1, measuring the interaction between the test molecule and the nucleic acid wherein a decreased interaction in the presence of a test compound is indicative of a test compound which reduces fat deposition or modulates an NIDDM symptom. The instant invention therefore does not contain patent eligible subject matter as it is drawn solely to the mental step of determination. Claims 25-28 and 30-35 are rejected as being dependent upon rejected claims 24 and 29.

Response to Arguments

Applicant's arguments with respect to claims 1-5 and 14-18 have been considered but are moot in view of the Applicant's cancellation of those claims and the new ground(s) of rejection under 35 USC § 101 as applied to new claims 24-35 above.

Conclusion

No Claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
